in line 13, after the term "vessels;" cancel the term "and"
in line 17 after the term "working container" insert "; and wherein the
displacement means comprise support means for supporting the
reservoir, wherein the support means is configured to be tilted towards
the working container."

Allowable Subject Matter

2. Claims 1,2,5-12, and 18-22 are allowed over the prior art of record.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: prior art of record do not teach or suggest the following invention: a printing device for printing on a substrate with a printing medium using the "drop-on-demand" principle, comprising a print bead, at least one spray nozzle with an interacting piezoelectric element, the spray nozzle being in communication with a flexible working container, which is arranged at a fixed position, for degassed printing medium (in the case of claim 21 the maximum oxygen concentration is about 1 mg/l) at a working height with respect to the spray nozzle, wherein the working container is in communication with a releasable flexible reservoir for degassed printing medium and wherein the working container and the releasable flexible reservoir have an open connection between them such that during normal operation these form communicating vessels; wherein the printing device is provided with displacement means for moving the reservoir upwards with respect to the working container; and wherein the displacement means comprise support means for supporting the reservoir, wherein the support means is configured to be tilted towards the working container.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
